

QUENCH.AI

Bringing just-in-time learning
to busy professionals

Company profile

Quench.ai is an AI learning coach pioneering a new way for people to discover relevant content to supercharge their learning, upskill and improve their impact.

Learning is now less structured, more on-demand and increasingly video-first. Quench.ai delivers an AI-powered learning experience that's specifically designed for this new context, delivering relevant content and a real impact.

By indexing the world's educational videos, we deliver the most relevant minutes for busy professionals – so less time is spent searching – and more time is spent for learning. No more choice paralysis, rabbit holes, scrolling, scrubbing and

skipping videos to discover what you need to know. With Quench.ai, finding the right educational video to meet your needs is as simple as a short chat with your AI learning coach. Our AI-powered learning coach uses conversational AI to drive better discovery and contextual AI so you can search less and learn faster.

Imagine a more productive team who can quickly upskill, and learn best according to their immediate needs and interests. But there's more, Quench.ai has teamed up with industry leading experts to offer their content to busy professionals, and if they're looking for something more, they can book quality one-to-one time with their favorite expert to boost their learning.

Team

Quench has assembled a world-class team, led by our founder and CEO, Husayn Kassai.

Prior to Quench.ai, Husayn was the CEO and co-founder of unicorn AI identity company Onfido.

Product

✓ Conversational AI

Learners engage in a conversation with their AI coach to discover the most relevant minutes from the world's largest indexed educational video content library.

✓ Contextual AI

Learners benefit from video recommendations grouped based on relevant themes based on their conversation.

✓ Expert content

Learners have access to licenced educational content produced by experts and practitioners from across different sectors.
